

# Adjustable Volume Powder Pipette Dispensing System

Calibration adjustment insures precise volume control

Easy to use push/pull disconnect fittings

Ergonomic handle design maximizes operator comfort and control

Micrometer Gauge for simple repeatability

Easy to clean, rugged stainless steel and Delrin construction (Static dissipative and conductive handles available)

Adjustable head minimizes repetitive stress syndrome and improves efficiency

Interchangeable pipette tips will accommodate a wide range of sample volumes

Accurately measures variable volumes of powder

Replaceable sintered stainless steel filters avoid cross contamination and easy to clean

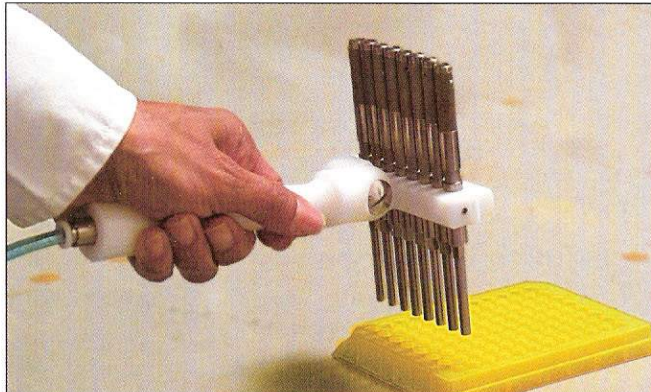

The affordable, adjustable volume Powder Pipetter is an accurate, time saving system for your powder filling applications.

This complete powder dispensing system features the ergonomically designed powder pipette, the control unit, foot switch, hose, A/C power cord and powder screen.

- Turnkey, requires only AC power
- Convenient handles for easy handling
- Adjustable pressure and vacuum knobs
- Illuminated on/off switch
- All stainless steel construction
- Foot switch minimizes hand movement
- Small foot print saves space
- Disposable in line filter unit filters and dries
- High capacity, reliable oilless pump for clean air/vac

## Standard and Custom Multi-head Pipettors

PIPETTE VOLUME				
Pipette Bore diameter	Pipette length	Effective Length Inches (mm)	Cu. in. (max.)	cc (max.)
0.125	2.2 in.	1.5 (38.1mm)	0.02	0.3
0.250	2.2 in.	1.5 (38.1mm)	0.07	1.2
0.375	2.2 in.	1.5 (38.1mm)	0.16	2.7
0.500	2.2 in.	1.5 (38.1mm)	0.29	4.8

Special lengths available on request at extra charge  
Adjustable volume will remain the same, the cannula volume will change with length Custom Tips and Filters available upon request.
